

Software Support Service Level Agreement

The support YoFinder Ltd provides to users of Magnify, and the standards it holds itself to. This document states the service; the agreement signed with each user is document 7.

PROVIDER	TIN	PRODUCT	SUPPORT	DOCUMENT
YoFinder Ltd	149047989	Magnify	08:00-23:00 daily	Draft 1

Draft for legal review. This document commits YoFinder Ltd to response and resolution times that a user may rely on and that RRA may hold it to. It should be reviewed by a legal adviser before it is issued or signed.

1 · SCOPE

This agreement covers Magnify — currently version 1.1.50, and any later version certified by RRA — as installed at a user's premises: the till application, the manager application and the waiter tablet application, together with the configuration required for them to operate as a Certified Invoicing System.

It covers the software only. Section 6 states what it does not cover.

2 · CONTACTING SUPPORT

CHANNEL	DETAIL	USE FOR
Telephone	+250 783 714 720	Anything urgent. A till out of service should always be reported by phone.
Email	info@yofinder.com	Non-urgent faults, questions, requests

These two are the support channels, and every time in this document runs from a report made through one of them. A message to an individual's personal phone or social account may be answered as a courtesy, but it does not start the clock: a fault reported where nobody is on duty to see it is not one YoFinder Ltd has failed to answer.

Support hours

08:00 to 23:00 Central Africa Time (Kigali), seven days a week, including public holidays.

These hours are set to match when restaurants trade. A point-of-sale fault matters most during service, and service is largely evenings and weekends — support that stopped at six on a Friday would be of little use to a user.

A fault reported outside these hours is treated as reported at 08:00 the following day.

Outside support hours

YoFinder Ltd does not attend premises outside support hours except by prior arrangement with the user, agreed in advance and charged at rates agreed in advance.

The user is under **no obligation to admit anyone** to its premises outside support hours, or at any time without prior arrangement, and doing so is a matter for the user alone. Where a user chooses to arrange out-of-hours attendance, it remains responsible for the security of its premises and for any obligation it owes its own staff in respect of their working hours.

3 · SEVERITY

Severity is set by the effect on the user's ability to trade, not by how the fault appears in the software.

LEVEL	MEANING	EXAMPLES
Critical	The user cannot trade. Bills cannot be settled or receipts cannot be issued.	Till will not start; receipts will not print; the till cannot reach the Sales Data Controller <i>for a reason within Magnify</i> , such as a software or configuration fault — as distinct from an outage of the controller or the connection itself, which section 6 excludes
High	Trade continues, but an important function is unavailable.	Kitchen tickets not printing; one terminal down while others work; stock not deducting
Medium	A function is impaired but there is a workaround.	A report showing wrong figures; a screen behaving oddly
Low	Cosmetic, or a request rather than a fault.	Wording, layout, a question, a change request

4 · RESPONSE AND RESOLUTION

Measured within support hours, from when the fault is reported.

LEVEL	FIRST RESPONSE	TARGET RESOLUTION
Critical	30 minutes	4 hours
High	2 hours	8 support hours, or by 12:00 the next support day where reported after 18:00
Medium	1 business day	5 business days
Low	2 business days	By agreement

What resolution means

A fault is resolved when the user can trade normally. That may be by correcting the fault or by providing a workable alternative while a correction is prepared. Where a workaround is used, the underlying fault remains open until corrected.

When the clock stops

Time does not count toward the times above while YoFinder Ltd is waiting on:

- information or a decision from the user, reasonably requested
- access to the premises, where attendance is required and access was requested during support hours and with reasonable notice

- restoration of anything excluded under section 6
- restoration of an outage at a hosting or infrastructure provider used by YoFinder Ltd — see section 6

The clock resumes when the obstruction is cleared.

Arriving unannounced does not stop the clock. The user is under no obligation to admit anyone outside support hours, or at any time without prior arrangement, and a refusal in those circumstances is not a denial of access for the purposes of this section.

Targets, not guarantees. YoFinder Ltd will use reasonable endeavours to meet the times above. They are not warranties, and failure to meet one does not itself create a financial liability — see section 8.

5 · HOW SUPPORT IS DELIVERED

Remotely first. Most faults are diagnosed and corrected remotely, which is faster than travelling.

On site where remote work cannot resolve it. Where a software fault cannot be diagnosed or corrected remotely, YoFinder Ltd will attend the user's premises within Kigali, at no additional charge, to establish whether the fault lies in Magnify and to correct it if so.

Attendance does not extend cover to hardware. Where the visit establishes that the cause is a printer, a cable, a computer, the power supply or the internet connection, repair or replacement of that item remains outside this agreement under section 6, and the visit may be charged at rates agreed in advance. Attendance outside Kigali is by prior arrangement and at the user's cost.

Escalation

A critical fault not resolved within its target is escalated to the Managing Director, who will contact the user directly with a plan and an expected time.

6 · WHAT THIS AGREEMENT DOES NOT COVER

Stated plainly, because a user relying on cover that does not exist is worse served than one who knows its limits.

- The user's internet connection, and any fault arising from its loss
- Computers, tablets, printers, cabling, power supply and any other hardware
- Electrical supply, including outages and damage caused by them
- Third-party software or services on the same equipment
- The Sales Data Controller and RRA's own systems
- Loss or corruption caused by unauthorised changes to the software, its database or its configuration
- Training beyond initial handover, unless separately agreed
- Data entry, including menu setup and stock counting

A certified system will stop trading when the controller is unreachable. That is required by the specification, not a fault in Magnify. YoFinder Ltd will assist in diagnosing the cause, but a controller or connection outside its control is outside this agreement.

YoFinder Ltd's own hosting

Magnify uses third-party hosting and database providers. Their outages are **not** excluded from cover — the user pays for a working system, and restoring it is YoFinder Ltd's responsibility. But such an outage is not within its power to shorten, so the times in section 4 are suspended for its duration, and YoFinder Ltd will restore service as soon as the provider does.

Trading without a connection is not a fault

On a non-fiscal installation, Magnify continues to operate when the internet is unavailable and synchronises when it returns. That is the intended design, not a defect, and it is not a fault to be reported.

On a certified installation the position differs, because the specification requires a response from the Sales Data Controller before a receipt may be issued.

7 · THE USER'S PART

Support depends on a few things the user provides:

- Report faults promptly, by phone where urgent, describing what happened
- Allow remote access when asked, and access to the premises where attendance is needed
- Maintain a working internet connection and functioning hardware
- Keep supervisor credentials secure and disclose them to no one outside the business
- Do not alter the software, its database or its fiscal configuration except through the application
- Accept updates required for continued compliance

Where a fault arises from any of these not being met, the response times in section 4 do not apply, though YoFinder Ltd will still assist.

8 · REMEDIES AND LIMITS

Repeated failure means three or more Critical or High targets missed within any rolling 90-day period, each reported through a support channel above and notified to YoFinder Ltd in writing at the time it occurred.

A target counts as missed only where the clock was running against it. An incident suspended under *When the clock stops* — awaiting the user, awaiting access, or caused by something outside cover such as the internet connection, the electrical supply, hardware or the Sales Data Controller — is not a failure by YoFinder Ltd and does not count toward the three. Without that, a venue with an unreliable connection would accumulate failures against a supplier that had done nothing wrong.

On repeated failure the user may escalate to the Managing Director and, if the failures continue, terminate on 30 days' written notice without penalty.

The response and resolution times are targets pursued with reasonable endeavours. They do not create liability for loss of profit, loss of trade or other indirect loss, nor for **any penalty, interest or assessment imposed on the user by RRA**.

YoFinder Ltd's **total liability**, taken together across every claim however many there are, is limited to the support fees paid in the twelve months before the event giving rise to the claim. One ceiling for the agreement as a whole, not a fresh one for each incident.

Nothing in this agreement limits liability where the law does not permit it to be limited.

Events beyond either party's control

Neither party is in breach where performance is prevented by an event beyond its reasonable control, including power failure, failure of a telecommunications or internet provider, an act of a public authority, civil disturbance, fire, flood or epidemic. The affected party will notify the other and resume as soon as it is able.

Which document prevails

Where this SLA and a signed Software Support Agreement conflict, the Agreement prevails.

9 · UPDATES AND VERSIONS

Corrections and improvements are issued as new versions of Magnify. A certified installation does **not** update automatically: each version is installed deliberately, so that an installation cannot move past the version RRA has approved.

Where RRA requires a change for continued compliance, YoFinder Ltd will provide the updated version and the user will install it. Where a change is required urgently, it is treated as being of critical priority for response and communication; the updated version is delivered within the timeframe RRA sets, which the times in section 4 do not govern.

The software documentation accompanying Magnify is revised for every change, as the specification requires.

10 · TERM

This agreement runs alongside the user's licence for Magnify and continues for as long as that licence is in force. The user may terminate on 30 days' written notice. YoFinder Ltd may terminate on 90 days' written notice, and in no case on shorter notice than it owes RRA in respect of that installation.

On termination, YoFinder Ltd will provide the user with an export of their data as CSV and PDF within 30 days. Fiscal records are retained by the user as the law requires.

Draft 1 · Magnify 1.1.50 · YoFinder Ltd · TIN 149047989
